

Connect with us directly about the Library and Information Science program through our frequent **Online Information Sessions!**

Passionate about helping students? Want a degree that can prepare you for a fulfilling and challenging career within or beyond a P-12 school setting?

Then join us for an online information session to learn about the master's degree in Library Science offered at UK. Today's students need professionals who can spark their interests in reading and learning and teach them how to navigate the information landscape.

By completing this program, you can earn your American Library Association accredited master's degree in Library and Information Science and your School Media Library Certification in the same 36 credits, which you can complete entirely online or by taking some of the required courses on campus.

Successful completion of the School Librarian Program includes eligibility for change of rank. Earning the ALA-accredited degree will also give you the credentials needed to work as an information professional in other settings outside of primary and secondary education, such as public and academic libraries and community resource centers.

Upcoming Information Session Dates/Times:

March 10, 2016 at 2pm EST
(Health Sciences majors, open to all)

March 22, 2016 at 1pm EDT
